

Muneeb Rehman

Full-Stack Software Engineer

Full-stack engineer at Pismo, a Visa company, building micro-frontends in React and TypeScript and backend-for-frontend services in Go for Control Center, the operations interface of a cloud-native banking platform. Four years of professional experience across product front ends, developer tooling and full-stack web applications.

Experience

Software Engineer

02/2026 – Present

[Pismo, a Visa company](#) · London

- Full-stack engineer in **Operations UI**, an eight-person squad building **Control Center**: the web interface business operations teams use to build, manage and configure financial programs on Pismo's cloud-native banking platform.
- Working on **account management** across **micro-frontends** in React and TypeScript and **backend-for-frontend (BFF)** services in Go.
- Testing with Jest and React Testing Library and documenting in Storybook; services run on Kubernetes and AWS with Grafana, on a real-time, event-driven banking API.

Front-End Software Engineer

03/2024 – 02/2026

[Alma Economics](#) · London

- **Led the initial front-end development** of two greenfield, high-impact projects, **Cobflow** and **Evidence Maps**, in React and TypeScript, within a small, highly skilled team of seven.
- Maintained and developed several ad-hoc dashboards and visualisation tools, including **Theory of Change**.
- Moved into a **full-stack** role, contributing to the **Django** backend.
- Revamped the company's website in WordPress and Elementor, and built the backend for careers page submissions.
- Worked in a waterfall–agile hybrid using GitHub and ClickUp.

Software Engineer

07/2022 – 12/2023

[Imagination Technologies](#) · Kings Langley

- Designed, developed and maintained IDE tools with **TypeScript** and the **VS Code extension API**, improving the experience for embedded developers.
- Built a **WebdriverIO** automated testing framework, **reducing manual testing by 50%** and speeding up delivery.
- Resolved technical issues that led to a **40% performance increase** in key modules.
- Practised code review, documentation and **TDD** in an agile team.

Software Engineer Intern

07/2021 – 09/2021

[Imagination Technologies](#) · Kings Langley

- Built TypeScript tools for an IDE for embedded developers on the **RISC-V** architecture.
- Developed a **Signal Visualiser** with Chart.js for visualising signal data, such as data transmitted from DSP processors.

Teaching Assistant

02/2021 – 06/2021

[CodeYourFuture](#) · London

- Taught HTML, CSS and JavaScript to refugees and low-income learners, supporting the lead teacher in workshops.
- Marked coursework and gave students feedback.

Skills

Languages

TypeScript, JavaScript, Go, Python, Java, SQL

Front end

React, Next.js, Micro-frontends, Storybook, Jest, React Testing Library, HTML/CSS

Back end and cloud

Go, Node.js, Express, Django, GraphQL, BFFs, PostgreSQL, MySQL, MongoDB, Kubernetes, AWS, Grafana

AI and ML

LangChain, OpenAI, TensorFlow, Keras, scikit-learn

Tools and practice

Git, GitHub, Jira, Confluence, ClickUp, WebdriverIO, Jenkins, Linux, Agile, TDD, code review

Projects

Dhania

05/2023 – 2025

RAG assistant giving answers grounded in the user's own data.
Next.js, Prisma, LangChain, Clerk, Socket.IO, Tailwind CSS

AgileSaver

09/2021 – 05/2022

Android budgeting app with ML spending analysis, built in a team of seven.
Java, Node.js, PostgreSQL

Education

BSc Computer Science

Goldsmiths, University of London
09/2019 – 07/2022

Algorithms, software engineering, AI, neural networks, data mining
